Make sure to choose the right version based on your needs and professional requirements.

Step 3: Add the Full Version to Your Cart
After selecting the version of Dragon NaturallySpeaking 15 that you want to download, add it to your cart. If you opt for the downloadable version, this process is much faster than ordering a physical copy. When you add the software to your cart, you will be prompted to review your order before proceeding to checkout.

Step 4: Create or Log into Your Nuance Account
In order to complete your purchase, you will need to create a Nuance account. This account is used to manage your software licenses, purchases, and future updates. If you already have an account, simply log in.

Step 5: Complete the Purchase
After logging in, you will need to complete the payment for your Dragon NaturallySpeaking 15 full version. Nuance offers several payment methods, including credit and debit cards. Once your payment is processed, you will receive a confirmation email along with instructions for downloading the software.

Step 6: Download the Software
Once the purchase is complete, Nuance will provide you with a link to download the Dragon NaturallySpeaking 15 full version directly to your computer. The download file is typically an executable (.exe) or disk image (.dmg) depending on whether you are using Windows or macOS. Depending on your internet speed, this download may take some time.

Step 7: Install Dragon NaturallySpeaking 15
After the download completes, open the file to begin the installation process. The installation wizard will guide you through the process, including agreeing to the terms and conditions, choosing the installation location, and setting up any required peripherals, like a microphone or headset.

The software will also prompt you to set up your user profile. This involves reading a few sentences aloud so the software can adjust to your voice and pronunciation. This voice training is essential for improving accuracy.

Step 8: Start Using Dragon NaturallySpeaking 15
After installation and setup, Dragon NaturallySpeaking 15 is ready to use. You can start dictating text into documents, sending emails by voice, controlling your computer with commands, and using the software's many other powerful features.
